

**Con Edison Demand Response Programs
Commercial System Relief Program (21 Hour Notification Program)**

Event Call Windows for 2021

Customers participating in CSRP will be asked to reduce their energy use for a period of four hours. Advisory notice of a CSRP event will be provided 21 hours in advance and confirmed or canceled at least two hours before the start time of an event. Customers will be called to participate during their network’s peaking time. Table 1 lists Con Edison networks by demand response event call window. Table 2 lists the same information by borough. The network call windows remain unchanged from 2020.

Network boundaries are typically different from neighborhood borders. For example, the Richmond Hill network includes parts of Brooklyn and Queens. Current Aggregators and Direct Enroll customers should use the Network Lookup tool in the DR Portal. If you have further questions, email Con Edison’s Demand Response team at demandresponse@coned.com.

Con Edison Demand Response Programs Distribution Load Relief Program (2 Hour or Less Notification Program)

List of Tier 2 Networks for 2021

Customers participating in DLRP will be asked to reduce their energy use when there is a contingency affecting their specific area of Con Edison's electric system. Notice will be provided two hours or less before the demand response event start time. Electrical networks are separated into two tiers - Tier 1 and 2. Tier 2 networks are considered a higher priority for demand response and are paid at a higher incentive rate than the accounts in Tier 1 networks.

Any network not listed as Tier 2 is categorized as Tier 1.

For the 2021 DR season, one new network will now be categorized as a Tier 2 network (Ocean Parkway). One network will revert back to Tier 1 classification (Central Bronx). These changes were made in accordance to the revised evaluation criteria, as ordered by the PSC as part of filing 17-E-0741, to align the Tier 2 networks with those in most need of contingency load relief.

Network boundaries are typically different from neighborhood borders. For example, the Richmond Hill network includes parts of Brooklyn and Queens. Current Aggregators and Direct Enroll customers should use the Network Lookup tool in the DR Portal. If you have further questions, email Con Edison's Demand Response team at demandresponse@coned.com.
